

**Use only functions provided by NodeJS and no RegEx, no external lib
(1 hour)**

1. You have to group the below words by having the same letter but different position

Given these 15 words

['AMOR', 'XISELA', 'JAMON', 'ROMA', 'OMAR', 'MORA', 'ESPONJA', 'RAMO',
'JAPONES', 'ARMO', 'MOJAN', 'MARO', 'ORAM', 'MONJA', 'ALEXIS']

Create a function that print something like

ALEXIS - XISELA

AMOR - ROMA - OMAR - MORA - RAMO - ARMO - MARO - ORAM

MONJA - JAMON - MOJAN

ESPONJA - JAPONES

2. You have to remove the parentheses and reverse the word inside.

foo(bar) => foorab

(bar) => rab

foo(bar)blim => foorabblim

foo(foo(bar))blim => foobarooofblim
